

## **5. Conclusion**

- **It is necessary to be settled while keeping the balance about three problems of air pollution, global warming and the energy control.**
- **Integrated approach such as a car simple substance measure, a fuel measure, a transportation measure and in future, the introduction of a next-generation vehicle and fuel is important.**
- **Therefore industry collaboration, company collaboration, government collaboration and industry-government-academia collaboration are indispensable.**

**Thank you very much  
for attention**
